## Description

---

The Elise is a small and elegant folding knife, the classic "gentleman's" knife. It is very light, thanks to the titanium handle, and it is thin, so that it can be easily carried in your pocket.

The D2 blade material is one of the most popular knife steels in the world. It contains 12% chromium, which does not allow it to be called stainless, but still resists corrosion quite well. Among the positive features, it is also worth noting that it keeps the cutting edge sharp and has good toughness.

---
